To Whom It May Concern:

Hazelton-Moffit-Braddock Elementary School began using Right Start Math in the 2006-2007 academic year in our first and second grade combination room. This past fall, the students in third grade took the ND State Assessments and scored very well in math! All of the students scored well above the state average. The students scored either in the proficient range or in the advanced range in all areas. We are most pleased with the program. This past year we used Right Start in Grades Kindergarten through Three and are now in the process of implementing it also in Grade Four. Thank you Right Start!!
