# RightStart™ Mathematics

## Corrections and Updates for RightStart™ Tutoring Multiplication and Division, Book One

---

---

| LESSON                | CHANGE DATE | CORRECTION OR UPDATE   |
|-----------------------|-------------|--|
| Introduction, page xi | 11/01/2023  | The graphics on the top of the page had the wrong captions. The first abacus's caption should read " $6 \times 4 = 20 + 4 = 24$ " and the second abacus's caption should read " $7 \times 7 = 25 + 10 + 10 + 4 = 49$ ", not " $6 \times 7 = 30 + 12 = 42$ " on both figures.   |
| Day 48                | 02/09/2023  | On the first page, between the second and third figures directly below the $24 \div 6 = 4$ , the paragraph should read: Say: The math balance shows 24 divided by 6 is 4. The 24 is the total amount, the whole, the 6 is where the weights were placed, <b>the parts</b> , and the 4 is the number of weights needed to make it balance, <b>the number in each of the parts</b> . |
